

# ACTA MECHANICA

Vol. 94, 1992

## Contents

### Contributed Papers

- Bassanini, P., Lancia, M. R.:** Boundary integral equations of the first kind for planar vector fields in multiply connected domains . . . . . 43—57
- Benharbit, A. M., Siddiqui, A. M.:** Certain solutions of the equations of the planar motion of a second grade fluid for steady and unsteady cases 85—96
- Caviglia, G., Morro, A.:** Energy flux in dissipative media . . . . . 29—41
- Chiriță, S.:** Saint-Venant's problem and semi-inverse solutions in linear viscoelasticity . . . . . 221—232
- Maugin, G. A., Trimarco, C.:** Pseudomomentum and material forces in nonlinear elasticity: variational formulations and application to brittle fracture . . . . . 1—28
- Nosier, A., Reddy, J. N.:** On vibration and buckling of symmetric laminated plates according to shear deformation theories. Part I . . 123—144
- Nosier, A., Reddy, J. N.:** On vibration and buckling of symmetric laminated plates according to shear deformation theories. Part II . . 145—169
- Panagiotopoulos, P. D., Stavroulakis, G. E.:** New types of variational principles based on the notion of quasidifferentiability . . . 171—194
- Soldatos, K. P.:** A transverse shear deformation theory for homogeneous monoclinic plates . . . . . 195—220
- Wang, C. Y.:** Slow rotation of a disc in a fluid-filled casing . . . . . 97—103
- Wendlandt, B.:** Modelling of nonlinear dilatation response of fluids containing columns. Plastic and shear relaxation considered . . . . . 73—83
- Xu, C. S., Chia, C. Y.:** Nonlinear vibration of symmetrically laminated spherical caps with flexible supports . . . . . 59—72

### Notes

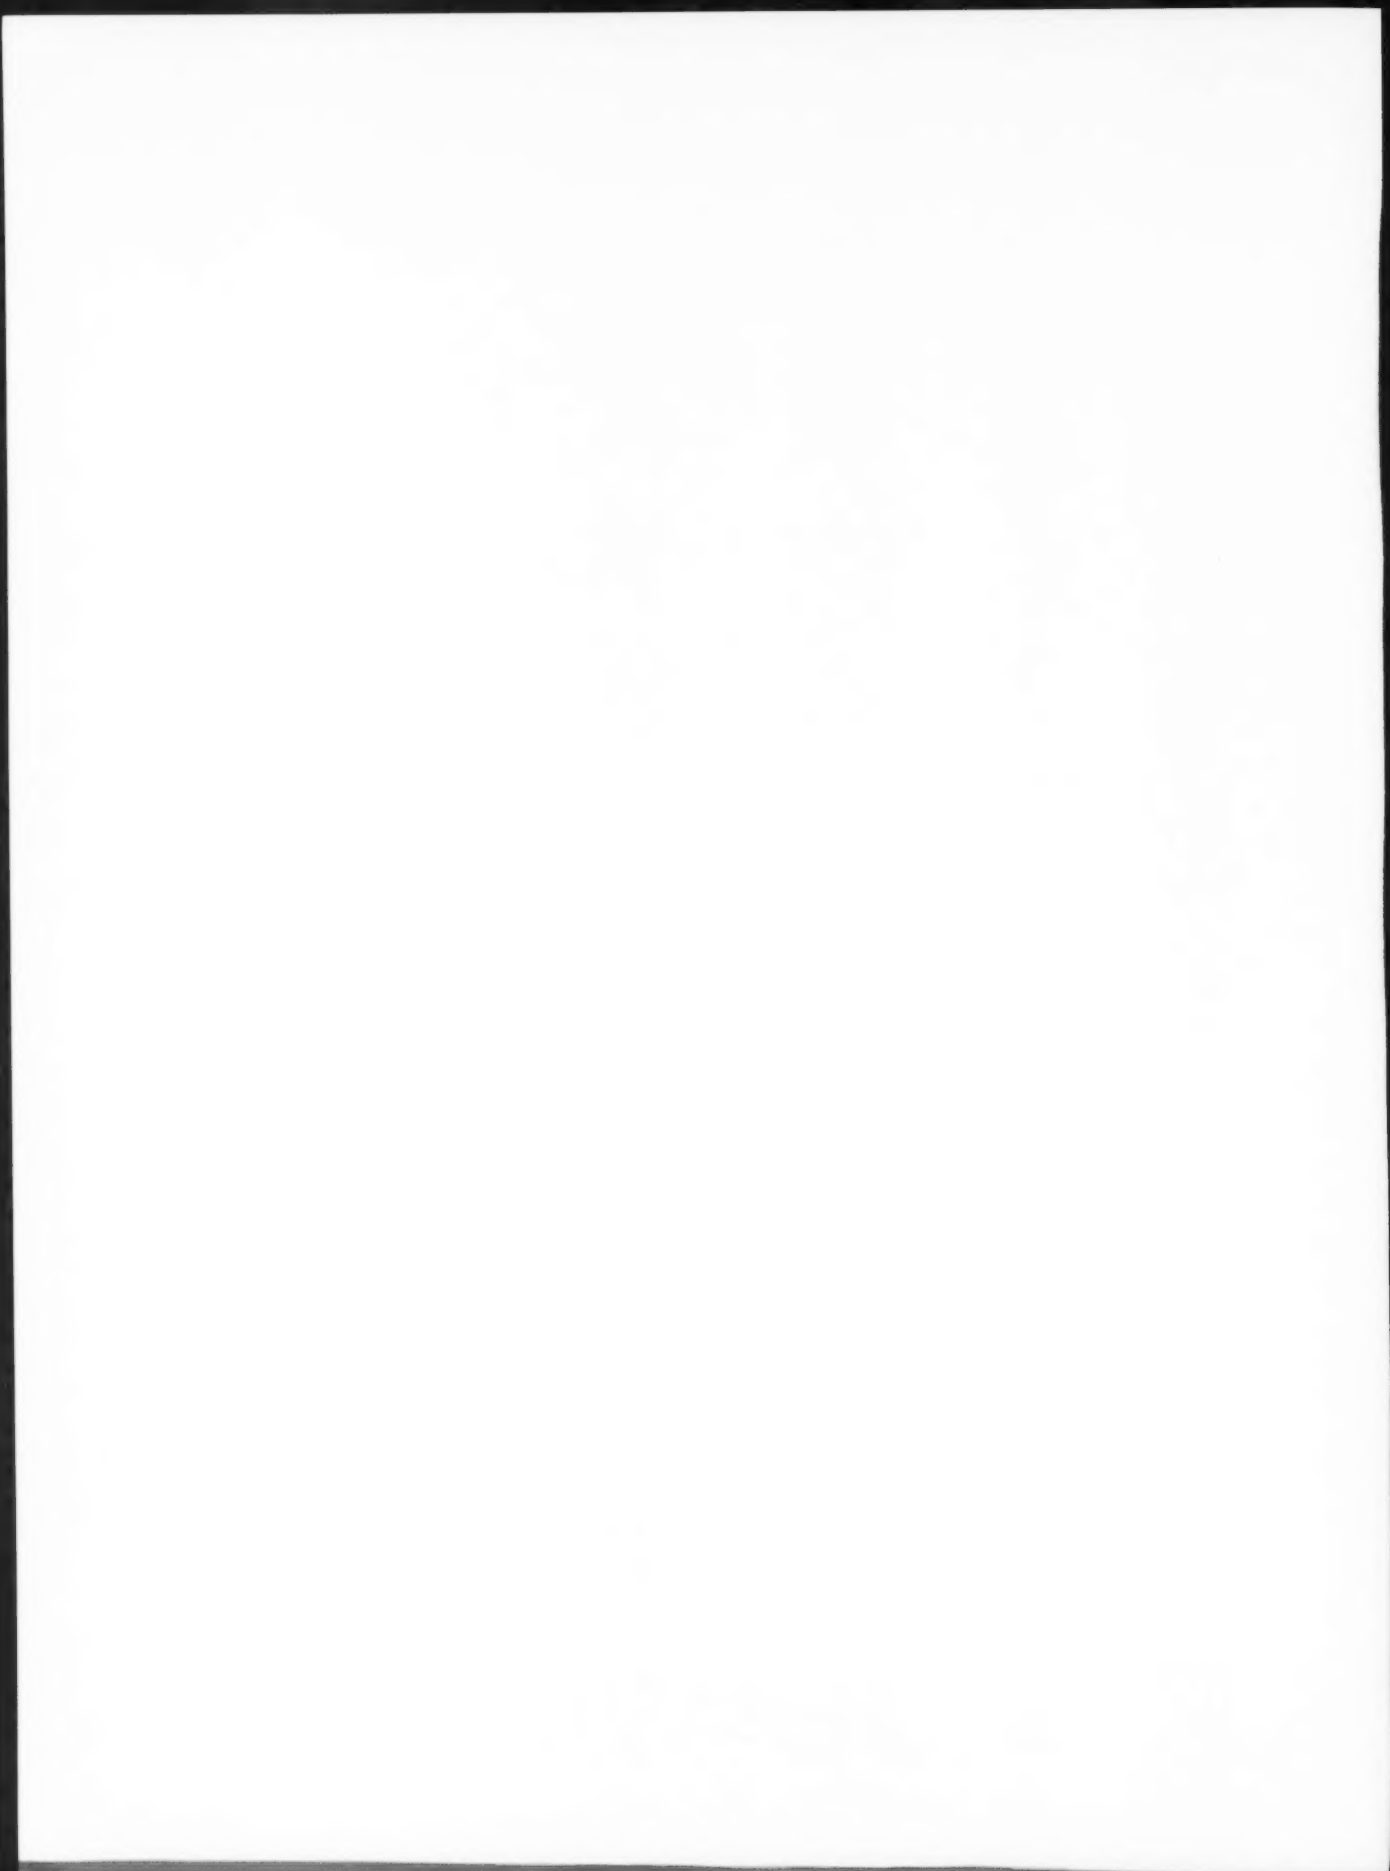

- Jianguo, W.:** The fundamental solutions of orthotropic shallow shells . 113—121
- Thanapandi, P.:** An efficient marching algorithm for waterhammer analysis by the method of characteristics . . . . . 105—112

Listed in **Current Contents, Mechanics**

Reviewed in **Applied Mechanics Reviews** and **Mathematical Reviews** and

**Zentralblatt für Mathematik** und **ihre Grenzgebiete/Mathematics Abstracts**

Abstracted by **INSPEC, Metals Abstracts** and **Engineered Materials Abstracts**

CISM International Centre for Mechanical Sciences. Courses and Lectures.

No. 318:

*W. Kosinski, A. I. Murdoch (eds.)*

## **Modelling Macroscopic Phenomena at Liquid Boundaries**

1991. 53 figures. VI, 288 pages.  
Soft cover DM 82,-, öS 574,-  
ISBN 3-211-82327-1

Five articles by workers from different disciplines acquaint the reader with a variety of approaches to the continuum description of macroscopic behaviour at liquid boundaries, including both fundamental aspects of the modelling procedures and specific applications.

No. 319:

*W. Szemplinska-Stupnicka, H. Troger (eds.)*

## **Engineering Applications of Dynamics of Chaos**

1991. 161 figures. VI, 325 pages.  
Soft cover DM 98,-, öS 686,-  
ISBN 3-211-82328-X

The book aimed for readers having only a modest knowledge in mathematics presents an elementary introduction into the concepts to study chaotic behaviour. Both theoretical and computational aspects are treated. Great emphasis is given to applications which cover a wide range of topics from the relation of chaos to turbulence to many practical nonlinear oscillation problems in engineering.

No. 320:

*A. Lewandowski, P. Serafini,  
M. G. Speranza (eds.)*

## **Methodology, Implementation and Applications of Decision Support Systems**

1991. 37 figures. VI, 322 pages.  
Soft cover DM 65,-, öS 455,-  
ISBN 3-211-82297-6

The book aims at giving the methodological framework for design decision support systems. Several applications are also described in detail, ranging from environment control, production planning, transportation planning. The book is of special interest to operations researchers, environment specialists, production planners, and transportation engineers.

No. 324:

*L. D. Davisson, G. Longo (eds.)*

## **Adaptive Signal Processing**

1991. 14 figures. VI, 203 pages.  
Soft cover DM 65,-, öS 455,-  
ISBN 3-211-82333-6

This volume covers the theory of adaptive prediction of discrete-time stochastic processes and its applications in various fields, such as speech reproduction, data compression, narrowband interference rejection, equalization filtering, and autoregressive spectral estimation.
